

In the Claims

1. A fishing accessory apparatus comprising:

a base; and

an accessory support including a plurality of accessory stations,

5 wherein said accessory support collapsibly attaches to said base for movement of said accessory support from a collapsed position to an operational position.

2. The fishing accessory apparatus of claim 1, wherein said base includes first and second generally opposed members.

3. The fishing accessory apparatus of claim 2, wherein said base includes at least one transverse member connected to said first and second members.

4. The fishing accessory apparatus of claim 1, wherein at least one part of said transverse member includes a brace adapted for securing said base.

5. The fishing accessory apparatus of claim 2, wherein said base comprises a generally rectangular frame wherein said first and second generally opposed members extend in a direction generally transverse to a longitudinal axis of the accessory support, and first and second transverse members  
5 extend in a direction generally perpendicular to said first and second members.

6. A fishing accessory apparatus comprising:

an accessory support including generally opposed first and second supports and at least one transverse support for supporting a plurality of accessory stations; and

5 a base including first and second generally opposed members, wherein said accessory support collapsibly attaches to said base for movement from a collapsed position to an operational position.

7. The fishing accessory apparatus of claim 6, wherein said first and second support and said transverse support are adjustable in length.

8. The fishing accessory apparatus of claim 6, wherein said first and second members are adjustable in length.

9. The fishing accessory apparatus of claim 6, wherein said accessory support attaches to said base via at least one hinge.

10. The fishing accessory apparatus of claim 6, wherein said first and second members extend beyond a point of intersection of said accessory support with said base.

11. The fishing accessory apparatus of claim 6, wherein at least one of said accessory stations includes a fishing rod receptacle.

12. The fishing accessory apparatus of claim 11, wherein said fishing rod receptacle includes an aperture for receiving a fishing rod handle, a support region for supporting a fishing rod shaft, and a channel.

13. The fishing accessory apparatus of claim 12, wherein said fishing rod receptacle adjustably attaches to said transverse support via a fastener extending through said channel.

14. The fishing accessory apparatus of claim 13, wherein said fastener is a bolt and said transverse support includes at least one aperture for receiving said bolt.

15. The fishing accessory apparatus of claim 11, wherein said fishing rod receptacle adjustably attaches to said transverse support allowing for multiple axis adjustability of said receptacle.

16. A collapsible fishing rod holder for use with a boat comprising:  
an accessory support including generally opposed first and second supports  
and at least one transverse support for supporting a plurality of accessory  
stations; and

5 a base including first and second generally opposed members, and at least  
one transverse member including a brace adapted for securing said base,  
wherein said accessory support attaches to said base via at least one hinge for

movement from a collapsed position to an operational position and said first and second members extend beyond a point of intersection of said accessory support with said base

17. The collapsible fishing rod holder of claim 16, wherein said first and second supports include an adjuster for adjusting the length of said first and second supports.

18. The collapsible fishing rod holder of claim 17, wherein said first and second members include an adjuster for adjusting the length of said first and second supports.

19. The collapsible fishing rod holder of claim 18, wherein at least one of said accessory stations includes a fishing rod receptacle having an aperture for receiving a fishing rod handle, a support region for supporting a fishing rod shaft, and a channel for adjustably attaching said receptacle to said transverse support.

5

20. The collapsible fishing rod holder of claim 19, wherein said fishing rod receptacle adjustably attaches to said transverse support via a bolt extending through said channel and a corresponding nut secures said bolt.
